

User Requirement Document (URD)

1. Introduction

In districts where the Teacher Innovator Program (TIP) has taken root and grown over the years, teachers have embraced innovative teaching methodologies and continue to benefit from CEQUE's support during the active TIP phase. However, to truly embed these positive changes and ensure their longevity, it's crucial to empower teachers to champion their own ongoing learning and actively share their expertise with their peers so that they can continue with their growth even without the active presence of TIP.

Currently, many districts lack dedicated platforms where teachers can regularly convene for self-directed professional growth and collaborative problem-solving. The Teacher Leadership Circle (TLC) directly addresses this gap by creating these vital spaces. Furthermore, by nurturing and empowering motivated and pedagogically skilled teachers, TLC enables the district to leverage their expertise to drive continuous improvement in the overall quality of education.

TLC groups are formed in each district by CEQUE in collaboration with motivated teacher leaders. Teachers come together to collaborate, brainstorm, and tackle real classroom challenges in TLC meets held for a TLC group in each district. Experts deliver powerful master classes, sharing actionable insights and proven strategies to elevate every classroom. Teachers stay energised through vibrant online forums, where they exchange ideas, inspire each other, and push their practice forward.

2. Scope

This document covers the TLC M&E system including the following:-

1. Planning of TLCs across blocks
2. Data management of all details of TLCs conducted/cancelled
3. Tracking of conducted TLCs against targets and plans
4. Generation of reports/enquiries required for TLC team
5. MIS for donor and senior management reporting

3. Current Situation

The existing system is a set of Google sheets stored in a common folder which is accessed by many persons. There are no validation checks and no standardisation, so this poses a challenge in terms of data security and data validity. Master table updates are not automatic so there is a chance that the data may not be current at a given point in time. There are no reports/enquiries for M&E so the reporting indicators need to be calculated manually.

4. Proposed Solution

The new system should be a web-based system (mobile app NOT required) with access on functions based on the employee role. However, the system should be usable on the mobile phone since the users will not have access to a laptop. There should be validation checks to ensure data accuracy and access control to ensure data security. There should be automatic master data updates and automatic reports/queries for donor/senior management.

5. Data and Reporting Requirements

The existing TLC Group Master, Teacher Leader Master, TLC Members Master, TLC & Masterclass Master, Coach Master data will be provided through Excel files which will have to be uploaded into the system. The teacher code will need to be generated for each teacher.

Block-wise targets for TLCs will be set and there will be monthly planning for TLCs.

TLC Group Master – the details of all TLC groups that have been created.

- TLC Group Code (codification system given in Appendix)
- District
- Block
- Location
- Date Formed
- Teacher Code of the Teacher Leader

TLC Members Master – list of all teachers who are members of the Leadership Circles.

- District
- Block
- TLC Group code
- Membership date (Date on which the teacher was added as a member)
- Teacher Code (system generated)
- Teacher Name
- School
- Gender (M/F)
- Mobile no.
- Email address
- TIP Teacher (Y/N)
- If Y, no. of years in TIP
- Coach who referred the teacher

Teacher Leader Master – the details of all teacher leaders.

- District
- Block
- TLC Group Code
- Teacher Code

TLC & Masterclass Master – the details of all TLCs and Masterclasses.

- Type (TLC or Masterclass)
- District (will be blank for Masterclass)
- Block (will be blank for Masterclass)
- Code (codification system given in Appendix)
- Status (Planned/Conducted/Cancelled)
- Date conducted
- Location conducted
- Start time of TLC/Masterclass
- End time of TLC/Masterclass

- Led by
- Topic
- Total attendance
- Remarks (reason for cancellation)

Coach Master – the details of all active coaches.

- District
- Block
- Coach Emp No
- Coach Name

TLC Attendance - the details of teachers who have attended the TLC.

- District
- Block
- TLC Group Code
- TLC Date
- Teacher Code

6. Process

Update of Master data

New TLC groups, Teacher Leaders to be added to the system through data entry screens in the respective Master tables by the System Admin. Any changes in the Coach Master to be done through update screens by the System Admin.

Addition of Masterclass attendance data

After a Masterclass is conducted, a new record to be added to the TLC & Masterclass Master by the Sustainability Lead. The Masterclass code to be system generated as per the codification process given in the Appendix.

Addition of TLC Attendance data

After a TLC Meet is conducted, the TLC Manager to enter the attendance through a data entry screen. Depending on the District entered, the correct TLC Group code should be selected from the dropdown. The date of the TLC, the location and the person leading the TLC should be entered.

If the attendee teacher is a registered teacher, then the name is to be selected through the dropdown from the Registered Teacher Master and the Teacher code to be added to the TLC Attendance file.

If the attendee teacher is not registered i.e. her name is not found in the dropdown, the following data will be entered by the TLC Manager.

- Teacher Name
- School
- Gender (M/F)
- Mobile no.
- Email address
- TIP Teacher (Y/N)
- If Y, no. of years in TIP
- Coach who referred the teacher

Based on the data entered, a new record should be created in the Registered Teacher Master with the additional data as below: -

- District (as entered on the screen)
- Block (as entered on the screen)
- TLC Group code (as entered on the screen)
- Teacher Code (system generated)
- Date on which registered (TLC date)

After all the attendance data is entered, a record should be created in the TLC & Masterclass Master using the data entered on the screen. The Total attendance should be calculated as the total number of teachers who attended the TLC.

7. Reporting and Outputs

The following dashboard data is required to date with a filter for district and block:-

- #of TLC groups formed
- #of Teacher Leaders
- #of TLC Members (TLC members)
- #of TLC Meets Planned
- #of TLC Meets Conducted
- #of TLCs cancelled
- #of masterclasses held

The following data is required at the end of the year:-

- % of teachers who have attended minimum 3 TLCs over the year
- # of unique teachers attending 60% or > of TLC meets
- Average # of Teachers attending Masterclasses
- Attendance report for each TLC member – how many TLCs attended, % of total
- #of TIP teachers who have attended at least 1 TLC
- #of non-TIP teachers who have attended at least 1 TLC

The following data is required for each TLC group (filter on district and block):

- # of teachers per TLC group
- Average attendance per TLC group
- Target versus planned versus conducted TLCs

This longitudinal data is required across at least 5 years (filter on district and block):

- % increase in # of TLC groups formed year on year
- % of TLC groups sustained year on year (If a group meets less than 50% of the planned meets (10 per year) then we can say that the TLC group has not been sustained)
- % increase in no of TLC Members year on year
- % increase in no of teacher leaders year on year
- % of TLC groups meeting planned versus targets (10 meets per year per TLC group)
- % increase in the no. of unique teachers attending 60% or > of meetups year on year
- % increase in the average attendance per TLC group year on year
- % increase in average attendance per master class
- % of unique teachers sustained in TLC groups across 5 years

8. Access Control and Security

CEO, Senior management, Communications	View reports, dashboard, enquiries
Sustainability Lead	Edit on TLC & Masterclass master only to create Masterclass record, View reports, dashboard, enquiries
Tech/M&E Team	Full edit access on all functions
TLC Manager	Data entry of TLC, Masterclass attendance, View reports, dashboard, enquiries

Appendix

TLC Group Code **XXnn-YY**
 XX = district 2-letter shortform
 nn = running serial number within the district
 YY = group 2-letter shortform

Masterclass Code **MSnnn**
 nnn = running serial number

Teacher Code **Tnnnn**
 nnnn = running serial number
